DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1,2,3,12,13,15,16 drawn to a DNA sequence of hTFIIIA gene coding for the amino acid sequence of SEQ ID No: 2, containing SEQ ID No: 3, an expression vector, a host cell and a method of using for diagnosis and treatment.

Group II, claim(s) 1,2,4,12,13,15,16, drawn to a DNA sequence of hTFIIIA gene coding for the amino acid sequence of SEQ ID No: 2 containing SEQ ID No: 4, an expression vector, a host cell and a method of using for diagnosis and treatment.

Group III, claim(s), 1,5,12,13,15,16, drawn to a DNA sequence of hTFIIIA gene having the sequence beginning at nucleotide 176 and finishing at 1270 of SEQ ID No: 3, an expression vector, a host cell and a method of using for diagnosis and treatment.

Group IV, claim(s) 1,6,12,13,15,16, drawn to a DNA sequence coding for hTFIIIA and a DNA sequence that hybridizes to it, has homology with it, or fragments of it, an expression vector, a host cell and a method of using for diagnosis and treatment.

Group V, claim(s) 1,7,8,9,12,13,15,16, drawn to DNA sequence that coding for hTFIIIA comprising modifications introduced by suppression, insertion, and or substitution, an expression vector, a host cell and a method of using for diagnosis and treatment.

Group VI, claim(s) 10,11,15,16, drawn to a polypeptide having the function of hTFIIIA, a method of making and a method of using the protein for diagnosis and treatment.

Group VII, claim(s) 14, drawn to a plasmid deposited under CNCM no. I-2071.

2. The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the DNA sequences

of inventions I-V are all structural, functionally, and chemically unrelated. Furthermore, the protein, method of making the protein, and method of using are for different and unrelated purposes.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
